

HM-series hammer mills

Technical information

- Range of production capacities for effective milling
- Power requirement ranging between 7.5 kW and 55 kW
- Various options on number of rotor stages to suit application

Applications

- Ideally suited for food and feed applications
- Milling of animal feeds, grains, legumes and other products
- Milling of extruded products to produce flours and porridges

Features

- Screen replacements are done within seconds
- Easy access for maintenance
- High tip speeds for increased throughput
- Fine granulation milling
- Even particle size with narrow distribution
- 24-hours local maintenance and support
