

TX-series co-rotating twin-screw extruders

Technical information

- Co-rotating, full intermeshing screws
- Nominal barrel bore diameters from 32 mm to 120 mm
- Production capacities varying from 50 kg/h up to in excess of 4500 kg/h
- Fully automated PLC control system
- Drive motor power ranging between 18 kW and 400 kW

Features

- Fully automated PLC control system
- User-friendly intuitive operating system
- Low maintenance cost
- Recipe manager that ensures repeatable high-quality production
- High-quality products with reliable consistency
- Easy access and analyses of production statistics
- Built-in protection devices to safeguard extruder
- 24-hours local maintenance and support
- Power dip recovery function

Applications

- Processing of maize, soy, wheat, legumes and other products
- Produces products for food, feed, aqua feed, pet food and breweries markets
- Ready-to-eat or precooked products
- Variable shapes, sizes and diameters of extruded products
